Set up, organizing and development for business in radiation therapy.

Prof. Dr. med. Ulrich M. Carl
Leader Medicine and Health Care Systems

MCK neoPlan experts advise hospitals, medical offices, companies and governments, both national and international, practical and flexible in all fields of organisation and organisational development in radiation therapy:

- consulting, conception and execution of construction projects in radiation therapy - in sub- or turnkey projects
- conception and coordination of a comprehensive supply management (resource management, manpower, health care systems)
- analysis, consulting and support in the implementation of change processes in already existing systems
- customised solutions based on individual requests
- trainings, seminars and workshops on single, individual or overarching topics

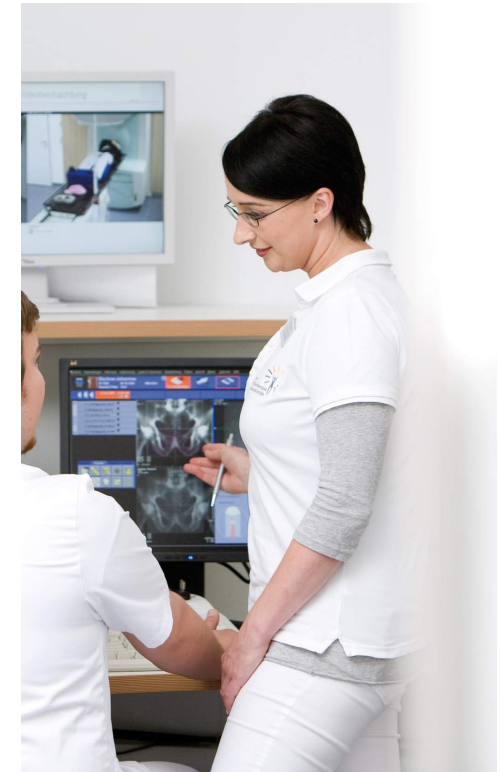

MCK neoPlan works based on a comprehensive, modulated scheme, which considers all areas of your company and hence ensures a sustainable development. For the customer the benefits of this method are a high degree of transparency, overview and multifaceted options in choice and assembling.

„You don't have to explain your work to us, for being understood.“

Our accomplishments in training and consulting are planned, controlled and supervised by experts. MCK neoPlan embodies professional and organisational competent, functional contents. We know, that management can not be practiced as an end in itself, but has to be frame and basement for your good work - so it will be the economic viability of your company.
